Thanks Derek - we will be talking with Steve Mason tomorrow regarding this request and will advise the outcome of the discussion. Believing this would not be something we would fund from our MA but we'll see what Steve has to say from a FEMA standpoint.

To Whomever is on deck today,

Attached and below is a request from Bravo. Not sure if I should sign since I don't think that I am technically the Bravo LSC, but please let me know. I'm aware of the details on this. So, with that, I pass it to you for processing/action as necessary.

Thanks,

Derek

Subject: FW: Radio replacement 213rr

Derek and Joe:

Attached is a write up from Mike S. (Region 2 EPA) summarizing the incident and a signed 213RR with appropriate specifications, model numbers, accessories etc. to do an "in kind" replacement for lost asset.

Warren
Bravo BD

The radio used by OCR Team 7 provided by Harris County was accidentally dropped into the ship channel while I was crossing over to the platform vessel to return to the decon-pad. It was attached to one of the clip attachment points on my backpack by the belt-snap-clip on the back of the radio. After I crossed over one of the crew handed over the backpack and the radio hit the side rail on the platform popping the clip causing it to fall into the water and sink before anyone could retrieve it. I do not believe that the crew member realized the radio was attached when he passed over the backpack.

I hope this is sufficient to get the Harris County folks' radio replaced.

Let me know????

MikeS

Mr Zehner,

Here's the ICS-213rr for the radio that you requested.
